

Claims-management software

Designed specifically for medical malpractice, professional liability and general liability claims

Track all claims information in one place

Helps claims managers stay organized

Simplify claims management

Managing medical malpractice and professional liability claims is a complex process. Healthcare facilities and professionals need to guard against unexpected financial losses—and keep an eye on their reserve line.

RL6:Claims helps healthcare organizations save time by tracking their claims information in one place. Manage claims, from first notice to disposition, track expenses and generate financial reports. Unlike other claims-management software, RL6:Claims was built by RL Solutions specifically for healthcare administrators, captives and risk-retention groups. And it's available at a fraction of the cost.

- Integrates with RL Solutions' risk-management software, so you're always using the latest event data.
- Track insurance and transactions by defendant or claim level—or both options.
- Define the financial transactions and calculations you want to track to produce impressive loss/run reports for your TPA.
- Simple search criteria put the data you need at your fingertips—no more searching through paper files!
- Easily create the reports you want using built-in templates, or design your own.
- Includes litigation face sheets and claims reports: loss/run, aggregate erosion, triangle and physician credentialing.

“The biggest change has been moving to a virtually paperless claim process. RL Solutions' claims-management software helped us organize everything in one easy system, including scanned documents and email attachments.”

Jim Carney, Claims Manager
John C. Lincoln Health Network

RL6:Claims is great for:

Claims managers
Quality officers
Legal-affairs staff
Directors of risk management

Manage all claims documentation

RL6 is easy to learn—and easy to use

1. Surprisingly **straightforward entry**. Intuitive screens make it easy to manage claims.
2. Completely configurable **forms** let you capture and record the claims information you want, the way you want it.
3. Integrates with **incident and feedback systems** to import relevant data into a claim file.
4. **Do-it-yourself reports**. Build and export the reports you need—without IT assistance. User-friendly wizards guide your every step.
5. Configurable **layout** means that the functions you need are only a click away.
6. Comprehensive **audit log** tracks all actions, including who has viewed and changed claim files.
